

MONI AI - Month-End Closing Checklist (Finance)

Audience: finance. Contains no client-identifying detail by design.

1. Cut-off. All delivery notes dated in the period must be invoiced before closing.
2. Accruals. Unbilled deliveries are accrued at cost, not at sales value.
3. Reconciliation. Bank, ledger and the Odoo stock valuation must agree before the period is locked; an unexplained difference is escalated, never adjusted away.
4. FX. Foreign-currency balances are revalued at the closing rate.
5. Lock. The period is locked after review, and later entries need an approval.
